Europe & Africa
We are where you are. Impacting life!

Our regional offices with more than 10 people

We’re present in more than 25 Countries across Europe and Africa with:

- Steam and heat engineering expertise and know how to understand what’s necessary to decarbonize and improve efficiency!
- We have the complete service capabilities to engineer, supply and execute any type of steam and heat service necessary on your steam and heat process!

Europe & Africa
How have we helped others

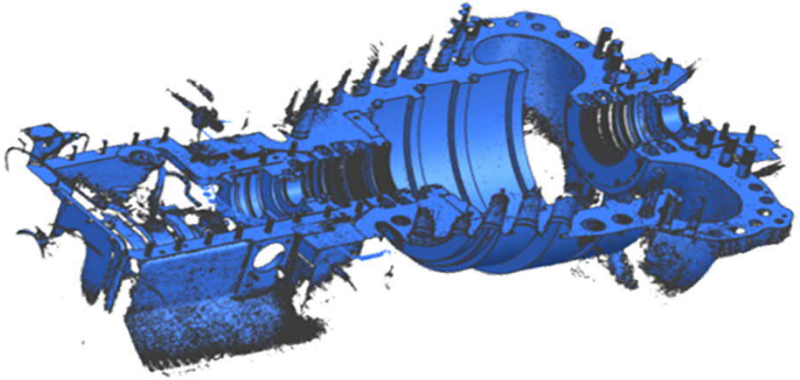

Instead of scrapping an old steam generator turboset from a different manufacturer we have, together with the customer:

- Defined the new required operating criteria;
- Reversed engineered the full train;
- Checked all civil and mechanical constrains;
- Supplied a brand new set of internal parts, gearbox, generator and control system.

When completed, you will have a new operating generator train with a much lower investment and faster installation!
