Restricted

Challenge

- Wish to keep equipment local
- Fast response to emergent work during outages
- Increased pressure on reducing plant downtime
- Political requirements for localization

Solution

Fully enabled regional service network

- Shop methods and standards
- Cost and cycle time benchmarks
- Repair recommendations and alternative solutions
- Patterns and insights from our fleet experience

Benefit

- Local repair and Product Competence Center knowledge and support
- Increased Responsiveness
- Improved Repair Time
- Reduced Downtime
- Reduced Transport Costs

STG – Global Repair Network
Country overview

We are where you are: Fully enabled regional service network!

Typical scope for repair

- DCI (Disassemble, Check and Inspection)
- Machining
- Welding
- Renewal of sealing strips
- Re-blading and Balancing
- Installation and fitting of new parts
